(1. Developer)(2. Tech Head), (1.Google - Google Code-In)(2. Wharton Youth Global)
(1. Top 10 globally, GCI for Fossasia; certified Fossasia dev)(2. 1st-India; 2nd-Asia; top 12-global in KWHS; built ML models for stock analysis)

Writing

Personal Essay

Discuss an accomplishment, event, or realization that sparked a period of personal growth and a new understanding of yourself or others.

Arjun v/s Pandey

August 24th, 2019: The microphone boomed 'Our Cultural Head Boy for the batch of 2021 is Arjun Pandey'.

Joining JPIS in 6th grade, I was convinced that my victories lay in breaking my elder brother Kush's feats. My target for the 100-meter race wasn't Usain Bolt's 9.58, but Kush's 11.2, not a 100 in CS but rather Kush's 95. However, in this final test to prove myself, I failed. I had dreamt of equalling my brother's footsteps as Head Boy, but again, I was brought down to being second in command.

That day I asked myself: *Who am I?* Amidst the flurry of thoughts, the sole answer that came to my mind was:

I am Arjun Pandey, second of my name, disciple to Kush's experiences, and the follower of the Pandey legacy.

"Was this the full-time whistle to my game?" This thought lingered in my mind that night and several other nights. However, the only bright spots during these dark times were the relentless morning drills and fiercely contested evening practices. As I trained for the upcoming football nationals, strategy and technique overtook self-doubt.

October 22nd, 2019. Full-Time Score 1-0. We were the national champions.

As I went up to collect the trophy, I heard my name being called out: 'Player of the Tournament: Arjun Pandey', and I stood shocked. 0 goals, 0 assists, 5 yellow cards, yet the best player? I was forced to ask: How did a midfielder manage to oust the goal scorers? Standing on the stage, the shine of the golden trophy was nothing compared to the golden realization that I had just attained: the field of football was the only arena that I had always believed to be mine because every time I strapped the captain's armbands and laced my boots, I didn't go out there to be a striker like Kush but a midfielder like Arjun. For years I thought I was trying to maximize my KPIs, only to realize that they always meant Kush Performance Indicators. Having spent a decade chasing Kush's dreams, it was time I found my Ikigai. For the next few weeks, I decided to wander before I wondered.

For years, I loved taking ScoutMe to unparalleled heights and achieve the goal of income inclusion. However, upon further inner reflection, I knew my true calling lay in solving the glaring problem of gender inclusivity.

November 31st, 2019: I launched Kicking Gender Boundaries because for me coding scouting portals and fixing bugs wasn't enough. It was time to reprogram mindsets and rewire perspectives.

Now that my blinders were taken off, I realized that I don't aspire to be Cersei, conquering known lands for greed, but to be an Arya and discover the undiscovered while I also discover myself.

Just like I paved a path on the field for trans* players, I took time to explore my callings off the field. Whether it was heading CollegeCollab to help my counselors, or creating Almpact to democratize the knowledge of AI for students across the world, I started to not only update the software I created but also upgrade and reinvent myself. The 1s and 0s not only became numbers I often saw on scoreboards but the bits and bytes to my personality, and the programs and processors of my life.

January 24th, 2020: I was conferred with the highest child civilian honor by the President of India, and I finally

realized what embracing the Arjun in my DNA really meant. That day, when the President asked me to introduce myself, again a question lingered in my mind: *Who am I?* While I gave a formal introduction that day, the real words that occupied my mind were:

I am still Arjun Pandey, but the first of my name, the breaker of conventions, and the realizer of my potential because today I don't just follow the Pandey legacy, I create my own.

Community Disruption

COVID-19 acted as a huge impediment to my plans for the summer. Kicking Gender Boundaries was all set to start its training for trans* players and sensitization workshops in-person, but within a week of the outbreak, all plans were canceled. COVID-19 pushed me to my limits in terms of keeping my initiative going. We shifted our workshops online and were able to capture a much larger audience. Instead of 100, I was able to sensitize 700 people through one Zoom call. I also worked closely alongside training academies to share online training modules and workouts for trans* players. Further, I was even able to launch a nationwide ambassador program right from my city and worked alongside 17 NGOs to support our cause everywhere.

I also had an internship planned, but the pandemic forced the company to shift into a WFH paradigm. Although I missed a lot of first-hand experience in the office, WFH allowed me to maximize productivity.

During quarantine, I brought in luminaries from across the world to speak with the student body.

- 10+ speakers including Krithiga Reddy(\$100bn fund at Softbank), Harbhajan Singh(cricketer), Rajat Monga(Director Tensorflow)

- 240,000 views

COVID-19 also gave me a lot of opportunities to make the best use of my time. Not only was I able to keep up with school but discover my passion for deep learning and AI.

Lastly, since I have been in a boarding house for 6 years the pandemic allowed me to spend quality time with my family.

Additional Information

Received the **highest child civilian honor** in the country(Pradhan Mantri Rashtriya Bal Puraskar in the field of Innovation) by President of India, Shri Ram Nath Kovind for ScoutMe and Kicking Gender Boundaries.

<https://www.youtube.com/watch?v=kjeq43gADbg>

Interacted with the honorable Prime Minister of India, Narendra Modi about inclusivity in sports.

Tweet by PM Modi:

<https://twitter.com/narendramodi/status/1220700428268134407>

Kicking Gender Boundaries:

Kicking Gender Boundaries is the only trans* inclusivity program in the country geared towards making football free of cis-sexism.

Organized India's first all-gender inclusive match. Officially sanctioned by the state football association, secured

\$10,000 in funding.

Secured partnerships with football academies for free training and employment opportunities for trans* players.

Started an ambassador program with 17 NGOs nationwide. Had talks on inclusivity. Mobilized transgender football teams across India.

Worked alongside BBFS to supply 35 trans* players free training modules.

Workshops for 700 coaches of BBFS.

Invited for TEDx talk on inclusivity.

Presence in: Delhi, Mumbai, Bangalore, Bhopal

Have any relatives No
ever been
employed by
Stanford
University?

Short Questions

Most significant challenge society faces

A girl child wanting to become a footballer. A young teen wishing to express their sexual identity. An adolescent woman from rural India aspiring to pursue engineering. In an ecosystem of differences, our struggle is acceptance. Resistance leads to regression, denial equals depression, and our answers lie in acceptance.

Last two summers

Snacks? Overloaded. Tents? Forgotten. 2019 I spent backpacking off the hills of Northern Ireland, revisiting all the famous sets of GoT.

Comfy Hoodies? On. Netflix? Deactivated. WiFi? Upgraded. 2020. Mornings spent coding. Evenings playing monopoly. Covering lost family time, while working on safely.ai and KGB(not the Russian organization :).

Historical moment or event

Old heroes, fading stories, newfound inspirations: 480 BC, the Battle of Salamis. 400 defiant Greek triremes. Common men united against a tyrant. The stakes: democracy. The odds: impossible. The outcome: extraordinary. The outnumbered Greeks outsmarted the Persians. Ingenuity in the face of adversity. Brain over brawn. Unity over strength.

Briefly elaborate on one of your extracurricular activities, a job you hold, or responsibilities you have for your family.

Parent: Arjun Pandey

Name: Kicking Gender Boundaries

DOB: 30th November 2019

Gender: Rainbow

Whether it was funding trans* players, or collaborating with a UN activist, KGB changed the conversations both on and off the field. The 22 players that played that day were divided by gender but united by pride.

One thing you are looking forward to at Stanford

Frosh Battalion. At campus, I want to ignite my entrepreneurial spirit by becoming a trooper for BASES and enlist myself in their summer immersion program. War-changing strategies, cutting-edge ideas, and revolutionary business plans, much like Bosnack and Systrom, at Stanford I wish to soldier up to emerge victorious.

Short Essays

Reflect on an idea or experience that makes you excited about learning

For a long time, working in teams to me meant specialists solving problems relevant to their areas. It was during writing code for ScoutMe when the hidden world of collective intelligence was revealed.

As I used to spend my days coding server-side scripts, I witnessed cross-contamination and I was bewildered: the developers helped generate positive cash flow, the marketing team secured sponsorships, and the finance bunch maximized community outreach. For a long time, I thought it was an eccentric stroke of luck that we reached 35,000 players but a chapter in Culture Code was enough to prove to me that cross-contamination isn't just contagious but also essential. ScoutMe's dream was realized not because of individual pursuits but due to them coming together.

So with every new venture that I started, I further went down the rabbit hole and experienced the wonderland of collective intelligence. Whether it was the labs of AImpact or the coding sprees of safely.ai, I came to realize that while developers may spend time setting up servers, and the designers improving the website, it was during the most unexpected team lunches and scrum meetings where the magic happened.

I now truly believe in the Ubuntu Philosophy, because put simply 'I am because we are'.

What makes me excited about learning is that at Stanford, I can not only interact and revolutionize with like-minded computer scientists but collaborate with anthropologists, physicists, economists, artists, and humanitarians and innovate in a world that not only accepts but promotes collective intelligence.

Note to future roommate

Hi,

I am an onion. Just like your food is incomplete without me, I promise to give you one incredible gastronomical experience at Stanford. While I might be a delight to someone's meals, I can certainly bring tears to your eyes with my jokes. So, If you ever have a hard day at MATH 51 or are coming back from an exhausting session at Stanford Gym, my questionable sense of humor can certainly be a mood changer.

While we will learn about the scarcity of resources at ECON 101, I witnessed the sheer paucity of good meals in the hostel, which led me to develop some amazing culinary skills. So if we're ever stuck at 2 am starting our very own HP garage, or are bamboozled by the unsolvable problem sets of CS229, and Tree House seems too far away, I'll be ready to prepare the perfect brew of coffee, and the most immaculate toast you can have.

From peeling ideas to harvesting progress, as you might have guessed, the chopping board is my favorite place. At Stanford, I hope to grow seeds of innovation and entrepreneurship with you and hopefully leave a legacy like that of Larry and Sergei. Even if 'co-founders' doesn't work out, I promise that unlike onions, our ideas won't stay underground but will be plowed across the world.

At campus, I wish to spend our days creating our recipes and hopefully cooking up some crazy ideas.

Happily harvested,

Arjun

Something meaningful to you and why

I keep a globe on my desk at all times, but unlike the ones with latitudes and longitudes, mine is gloriously titled with the words: 'Just Do It'. My soccer ball serves as a reminder of not only how the sport has taken me across the actual globe, but places within myself I never knew existed.

I was once a carefree defender, but countless mistakes taught me how to choose responsibilities (maintaining defense) over my impulsive urges (moving forward to score). Whether it was skipping the extra episode of B99 to

discuss game strategy, or declining invitations to late-night Fortnite tournaments to wake up early for 5 am practice, football taught me to prioritize what's needed over what's wanted.

After 14 years in the trenches, I started to realize how it's not only the strategy in my head but the fearlessness in my heart that is going to lead me to success. Whether it was fiercely fighting for airballs or dauntlessly diving into projects, football taught me to always go all in.

From arrogance to sportsmanship, and selfishness to solidarity, game after game, I have begun to take my failures, on and off the field, in stride. Minute by minute, match by match, the techniques of the game have become the tactics of my life. For some, football is a game; for others, a sport: but to me, it is a reminder of who I am, and hope to be, of everything I have achieved, or ever hope to achieve.

Additional Background

Misdemeanor or felony? No

Affirmations

I confirm that I understand and agree to uphold the spirit and letter of the Stanford Honor Code and Fundamental Standard. I confirm that I understand and agree to uphold the spirit and letter of the Stanford Honor Code and Fundamental Standard.

Agree to terms of Stanford application I certify that the information submitted in these application materials is current, complete and correct, and is my own work. I further understand and agree to the terms of the Stanford application instructions as posted at admission.stanford.edu, or as stated above, including Stanford's policies on the submission of the credentials noted above.

International applicants NOT applying for financial aid I confirm that I understand Stanford's financial aid policy for non-U.S. citizens and non-U.S. permanent residents. I also understand that Stanford requires all students who are not U.S. citizens or U.S. permanent residents to obtain and maintain an appropriate visa status for their stay in the United States.
